Preface

Traditional certificates with perforated edges have been the essence of earning an award. They play a role in acknowledging the person of the achievements earned. They serve an authentic message from the issuer about accomplishment to anyone who lay eyes on it.

Traditional certificates come with an incurred burden when the number of people getting certified grows. The generation of handmade or paper-based certificates takes from a week to a month. The details are can be erroneous as they are written by hand, re-issuing of such increase costs and time. Authentication and maintenance of the database for numerous certificates becomes a frantic work The cost and usage of paper also make traditional certificates not to be preferred in the current 21st century.

Digitized E-Certificates can be generated within minutes and sent to the receiver via an e-mail or by uploading it on the cloud. A large number of certificates can be generated with minimal errors, also the errors can be rectified instantaneously. No postal costs and no downtime for hand written content. The e-certificates can be employed with security features involving advanced cryptographic techniques such as steganography and secure hash functions.

The Q-CERGEN software is aimed to facilitate the generation of such authentic and foolproof e-certificates. User-friendly interface with secured accounts and can generate a minimum of 3 certificates per second.

Acknowledgement

We are indebted to a number of individuals who have contributed and assisted in the development of the software. Their contributions are the reflection of the performance from this software in its **Version 3.1**.

We express our gratitude to **Wg Cdr S N Shridhara (Retd)** for his guidance and advice in the development of the software for engineering institutions.

We wish to extend our appreciation to **Chiranjit Patel, Raghava R P, Sharath Payyadi, Sumanth M Bhat**, and **Vivek Urankar** for their assistance in data creation, analysis, and event managemnet for the generation of certificates.

We express our profound gratitude to **Venkata Reddy** for his invaluable support in gaining copyrights for the Q - CERGEN software.

We extend our earnest gratitude and respect to our parents and all our friends who have directly or indirectly supported us.

Chapter 1

Login

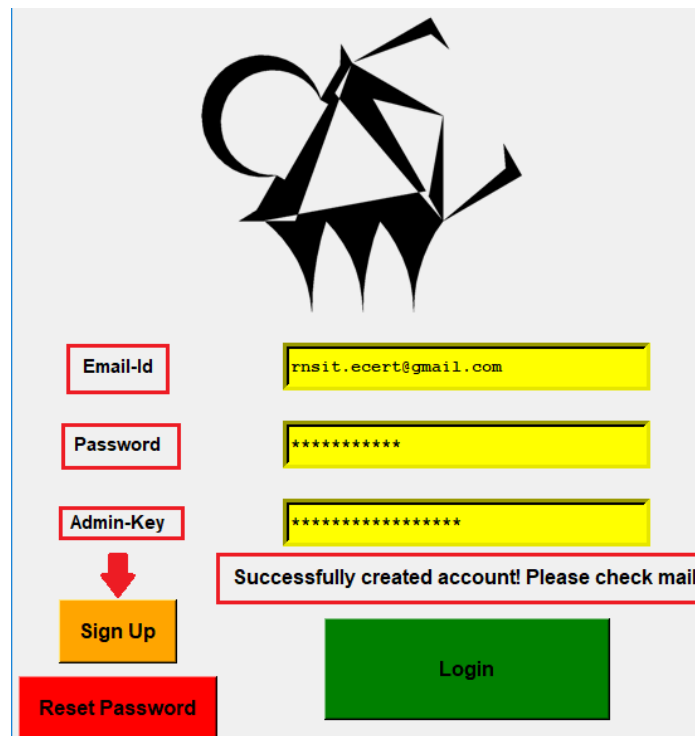

Navigation in the login screen and creation of new accounts. Resetting the password of existing accounts are done through this page. The outlook is depicted below, fields the user to enter are Email-ID, Password and Admin Key as per requirements.

The image shows a login and sign-up interface. At the top, there is a stylized logo consisting of a circle and several sharp, triangular shapes. Below the logo, there are three input fields labeled "Email-Id", "Password", and "Admin-Key". Each field is represented by a yellow rectangle with a black border. Below the input fields, there are four buttons: "Sign Up" (orange), "Reset Password" (red), and "Login" (green). The "Login" button is larger and positioned to the right of the "Sign Up" and "Reset Password" buttons.

1.1 Create New Account

- To create a new account, enter a working Email-ID, and a password of your choice.
- Preferably the password must have 8 characters with a special character
- The Admin Key is a must, please contact the Admin or Developer of the software in Contact Us
- All 3 fields must be entered, now clicking Sign-Up will create the account
- Please check verification email to the mail id provided, you can use the new account

1.2 Login with existing Account

The login form features a stylized logo at the top center. Below the logo, there are three input fields: 'Email-Id' containing 'rnsit.ecert@gmail.com', 'Password' containing '*****', and 'Admin-Key' which is empty. At the bottom left, there are three buttons: 'Sign Up' (orange), 'Reset Password' (red), and 'Login' (green).

The login form is identical to the one above, but with an error message 'Invalid Email-Id / Password' displayed below the 'Admin-Key' field. The 'Email-Id' field still contains 'rnsit.ecert@gmail.com' and the 'Password' field contains '*****'. The 'Sign Up', 'Reset Password', and 'Login' buttons remain at the bottom.
